

# BOTTLER & BOTTLER LITE

## Omnidirectional IED Disruptor

Bottler is an economical, water-jacketed, simple-to-deploy, omnidirectional disruptor. Two versions are available: Bottler™ and Bottler Lite™. Both versions are available in three sizes: 0.25 litre, 0.5 litre, and 1 litre.

Bottler disruptors defeat small to medium-sized IEDs, including those hidden in bags or suitcases. They are also effective in breaking open vehicles or other containers and disrupting their contents.

Can accommodate variable explosive loads

Highly potent explosive effect with a low NEQ

Effective against a broad spectrum of IED configurations

Widely used in Iraq to defeat IEDS & VBIEDs

# Performance

Bottlers are user-filled, making them easy to transport and store. Operators can load before deployment or at the target.

The charges can be used singly or in multiples - effects vary from ripping soft or loose internal vehicle components to completely opening the vehicle. Bottler is ideal for use inside a VBIED to destroy or separate components.

The 0.25l and 0.5l variants are very powerful, very compact general disruptors. Applications include smashing roadside bombs made from concrete cast around projectiles to expose the inside for identification and disposal, and the general disruption of hard and soft IEDs.

Explosive weight can be adjusted as required. The user may cut the central charge tube to reduce its length and, therefore, the NEQ. A scale that shows grams and ounces indicates where to cut and enables the operator to load accordingly.

Scalloped walls prevent charges from rolling once deployed and make it easier to tape two or more charges together to form larger arrays.

To further enhance the power and performance of Bottler, replace water with higher-density materials.

# Specifications

| Variant    | Height | Diameter | Water capacity | Bottler - weight loaded | Bottler - NEQ | Bottler Lite - weight loaded | Bottler Lite - NEQ |
|------------|--------|----------|----------------|-------------------------|---------------|------------------------------|--------------------|
| 0.25 litre | 125mm  | 60mm     | 195ml          | 340g                    | 20-110g       | 250g                         | 10,20,40 g         |
| 0.5 litre  | 150mm  | 80mm     | 550ml          | 778g                    | 20-140g       | 600g                         | 10,20,40 g         |
| 1 litre    | 200mm  | 100mm    | 1200ml         | 1550g                   | 20-200g       | 1300g                        | 20,40,80 g         |
