

# DIOPLEX EOD

## Low Order EOD Linear Cutting Charge

Dioplex EOD™ is a highly reliable and precise user-filled linear cutting charge engineered for low order EOD operations. It offers capabilities similar to the hard-to-obtain US Mk7 (mod 1-8) Demolition Charge Containers, which are compatible with US 60 Series and other NATO RSPs.

Dioplex EOD™ is compatible with most military and commercial plastic explosives and initiation systems. It is non-magnetic and can be used in shallow water, making it a versatile low order tool.

User-filled system - swift and simple loading and deployment

Powerful and efficient explosive effect

Can be stored and carried inert with no restrictions and loaded onsite for immediate use

No impact on initiation reliability when individual charges connected end-to-end

# Performance

Available in two charge sizes: 10mm and 15mm versions. Each charge is 150mm long and can be easily connected to create multiple arrays, making it easy to use.

Operators can deploy Diplox EOD charges individually, cut them to the required length, or combine them to create longer cutting lengths.

Use Diplox EOD against most explosive ordnance items, including air-dropped munitions, artillery shells, and rockets.

# Specifications

## DXE 10mm

- Length: 150mm
- NEQ: 25g
- Cut v S275 mild steel: 8mm

## DXE 15mm

- Length: 150mm
- NEQ: 50g
- Cut v S275 mild steel: 14mm
