

VCLMS

Vulcan Counter Limpet Mine System

The Vulcan Counter Limpet Mine System (VCLMS)[™] is a versatile, user-filled, modular shaped charge system based on the renowned Vulcan[™], designed to address underwater threats, including unexploded ordnance. VCLMS can be used independently or multiple systems linked together with detonating cord.

Available as a complete kit that includes all necessary accessory packs, or as a VCLMS Tool Roll Set.

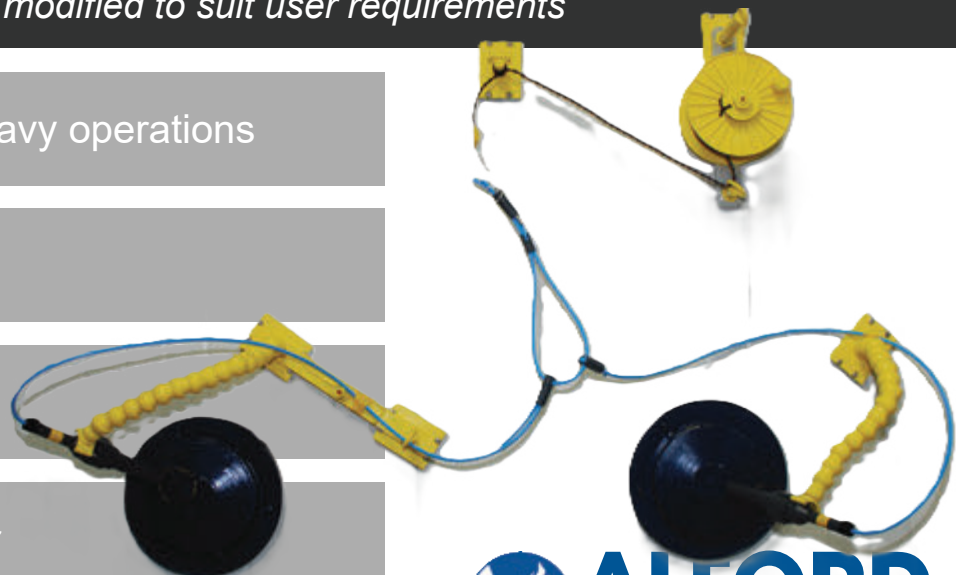

All kits can be modified to suit user requirements

Integral to one of the Five Eyes Navy operations

Multi-role explosive charge tool

Lightweight and easy to configure

Highly effective on land and water

Performance

VCLMS provides maritime EOD operators with a complete modular weapon stand system that can be adapted to suit a variety of target vessel or seabed conditions. The lightweight, modular weapon stand provides a rapid, reliable way to deploy multiple Vulcan™ EOD tools in a single dive.

The **VCLMS Complete System** includes enough equipment to support an EOD team for multiple missions, comprising five **VCLMS Tool Roll Sets** and various accessory packs.

It provides a basic kit for an EOD team addressing underwater threats and can be replenished as supplies are used. This kit is housed in a durable, high-quality transit case. Replacement items can be purchased as they are consumed.
