

WINDOW BREAKER

Single Shot Explosive Window Breaker

WindowBreaker™ is a single-shot explosive window breaker designed to gain access to vehicles with minimal shock and vibration.

Powered by a single standard electric or shock tube detonator, this user-filled explosive access tool is highly effective against tempered side and rear vehicle windows.

Engineered for minimal shock and vibration

Powered by electric or shock tube detonator

Simple to deploy by ROV

Highly effective against tempered glass

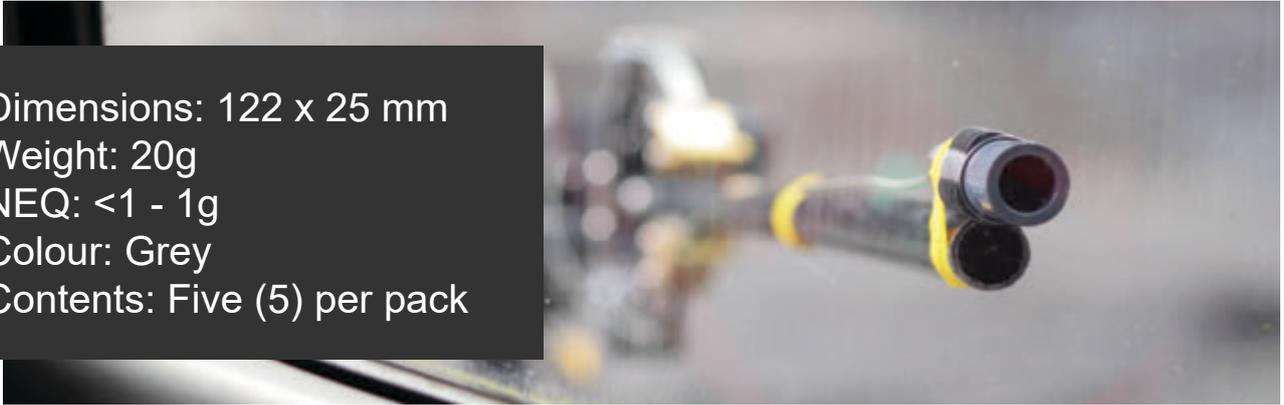

Performance

This user-filled, low-cost one-shot system can be mounted directly on the barrel of a disruptor or in front of a Bottler™, allowing for a single approach to gain access and disrupt an IED.

Specifications
