

## Vesuvius EFP™

The Vesuvius EFP™ uses the Misnay-Schardan effect to explosively form a highly effective penetrator. This EFP is the larger and more capable version of the Krakatoa EFP.

The Vesuvius EFP provides a powerful stand-off anti-armour / anti-structure effect with an extremely high degree of accuracy. The low fragmentation producing plastic body incorporates Picatinny Rails to enable the user to integrate sighting systems. Included in the kit are loading tools and options of different stands.

### Features include:

- > Misnay-Schardan effect / explosively formed penetrator
- > Stand-off anti-armour / anti-structure capability
- > Picatinny rails
- > Highly accurate

## Loading and Placing

Due to the mass of plastic explosive that is required (approximately 1.5kg), it is recommended that Vesuvius EFP™ is mounted for greater accuracy and stability. Stand options are available to best suit the various terrains and unit procedures.

## Applications

The Vesuvius EFP™ is a very versatile shaped charge. In addition to its anti-armour role it can be employed in general demolitions and EOD tasks as a Stand-off tool.

## Projectiles

A projectile is supplied as part of the kit. Please speak to us directly to discuss the capability of the tool.

## Specifications

Height	170mm
Weight Empty	1.0kg
Weight Full	2.5kg
NEQ	1.5kg
Part No.	VV2901
